

## **AMENDMENTS TO THE SPECIFICATION**

Please replace Paragraph [0060] with the following paragraph rewritten in amendment format:

**[0060]** The bracket 108 further defines a groove or recess 160 formed in the portion that is directed to the rail 104. The recess 160 includes a flank or lip 162. The lip 162 is at least partially sloped or canted which allows the bracket 108 to be hooked onto the upper rail edge 182 in an at least somewhat pivotable manner, as shown in FIGS. 29A and 29B.

Please replace Paragraph [0076] with the following paragraph rewritten in amendment format:

**[0076]** In a preferred embodiment, the locking member 185 comprises the means for engaging the back face 124 of the rail 104 adjacent the lower edge 184 against the bias of the clamp 112. Alternatively, other means for engaging the back face 124 of the rail 104 adjacent the lower edge 184 against the bias of the clamp 112 can be employed, such as a flexible hook ~~[[hook]]~~ formed on the bracket 108 itself, etc.
